Host Hotel Systems's Property Management System Integrates into TravelClick's Central Reservations Platform

Allows Hotels to Seamlessly Transmit Rates, Availability and Reservations to Maximize Revenue

NEW YORK – February 22, 2018 – [TravelClick](#), a leading global provider of data and revenue-generating solutions for hoteliers, and [Host Hotel Systems](#), a visionary developer of Front Office and Back Office Management Systems, today announced the joint integration of iHotelier® Central Reservations System (CRS) and Hostpms Property Management System (PMS).

This integration allows hotels to instantly update inventory across channels when a booking is made. These automated updates ensure that hotels are always in rate parity across all distribution channels, including the Hostpms platform. By reducing manual efforts and optimizing customer satisfaction, hotels save time and money while avoiding overbooking and negative guest experiences.

“We are delighted to partner with TravelClick to create a streamlined experience for hotels that rely on Hostpms and iHotelier CRS,” said Ana Glória, Partnership Manager, Host Hotel Systems. “This integration enables our common clients to simplify their management efforts and increase their overall productivity.”

Matt Vice, Vice President of Reservations Solutions and Global Connectivity, TravelClick, added, “Hotels that utilize both Hostpms and iHotelier can now leverage the best of both worlds with a CRS that increases bookings and a PMS that ensures reliability and flexibility. By automating this once-manual process, hotels can focus on what really matters; data quality, efficiency and driving direct bookings and revenue.”
